Dear Sir,

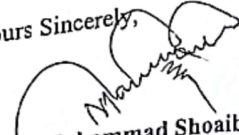

In light of the GRC recommendation dated 06/02/2023, the committee has suggested excluding the women's praying area and focusing solely on constructing washrooms. They have also informed us that the TMA intends to build a plaza in the same vicinity. Considering their construction plans, we require the precise location where the washroom can be constructed. In order to proceed with our design, we kindly request the TMA to identify and mark the designated covered area and share the relevant drawing officially with consent from WSSCA. This will enable us to move forward with our design accordingly.

We kindly request your prompt response regarding the precise location so that we may proceed with the design without delay.
