Subject: Misconduct of PMSCS Quantity Surveyor with Local Inhabitant/Plot Owner in Connection with Controversial Transportation of Excavated Material from the Dumping Site

This incident report is being shared with great concern, and we anticipate a pertinent and documented response from the PMSCS in this regard.

Mr. Mudassir Ali, a resident of Mohallah Ilyas-khail village Choona, is the plot owner leased by the Joint Venture (JV) Contractor for dumping excavated material from the Water Treatment Plant (WTP) site. Mr. Ali has filed a complaint against the Quantity Surveyor (QS) named Mr. Faisal of PMSCS for his misconduct on January 17, 2024. The incident occurred when Mr. Faisal, in his personal capacity, allowed a random trolley driver not associated with the contractor or employer, with permission to transport excavated material from the dumping plot. Upon objection by the plot owner, Mr. Faisal indecently argued, asserting that the excavated material is "**government property obtainable for everyone.**"

In conclusion, the reported incident involving the misconduct of PMSCS Quantity Surveyor, is a matter of serious concern. The inappropriate actions taken by the QS including permitting a random trolley driver to transport excavated material without proper authorization, coupled with his disrespectful behavior towards the plot owner are unacceptable. This incident raises questions about the responsible handling of government property and reflects poorly on the professionalism and conduct of PMSCS representatives.

PMSCS must ensure that its personnel adhere to ethical and professional standards while dealing with local inhabitants and stakeholders. Failure to address such misconduct may erode public trust and confidence in the KPCIP, and it is crucial that corrective measures are taken promptly to prevent any recurrence of such incidents in the future. We anticipate a prompt and documented response from the PMSCS regarding the steps taken to address this issue and prevent similar incidents in the future.
