(Registered Under Section 42 of the Companies Ordinance 1984)  
Ph: 0992-9311048, Email: [wsscabbottabad@gmail.com](mailto:wsscabbottabad@gmail.com)

No. CEO/WSSCA/023/2687

10/06/2023

To,

The Engineer/Resident Engineer  
Project Management and Construction Supervision Consultant,  
Khyber Pakhtunkhwa Cities Improvement Project,  
Abbottabad

**Subject:** KHYBER PUKHTUNKHAWA CITY IMPROVEMENT PROGRAM (KP-CIP PROJECT)  
EXTENSION OF JICA GRAVITY WATER SUPPLY SCHEME ABBOTTABAD  
Land Acquisition for Water Supply Line – Hurdles in the pipe line route at outlet  
(Choona Water Treatment Plant)

Reference to the letter: KPCIP/PMCSC/RE-ATD/CW-02/Lot-1/003 Dated 31 May 2023

The undersigned do not endorse the Para – 2 due to certain valid reasons however leaving this debate on side, this office prefers to move forward and discuss the actual issue related with progress.

It is being shared with great concern that the revised layout proposed by the PMCSC still needs realignment/relocation for guaranteeing the social feasibility that should support the logical designing of the pipeline route.

The proposed (revised) pipeline route is passing through green/agriculture fields which is routinely used by the land owners for agriculture production. Acquiring such productive land from the Centre of it to pass the pipe line may not be encouraged and supported by the community, revenue department and other stakeholders.

Since the proposed pipeline can probably be carried out through the barren land, village streets or using the commonly used passages to avoid the wastage of agriculture land and project's resources.

In light of above, it is strongly recommended that PMCSC along with CIU and Revenue Department must conduct a site visit and revisit the proposed route to assess the suitable way-out in the best interest of community and project's stakeholders. Furthermore, it is pertinent to mention here that already substantial amount of time is lapsed, therefore, the said visit needs to be planned on most urgent basis.

  
Chief Executive Officer  
Water and Sanitation Services Company,  
Abbottabad

**Subject:** Reply to subject "contradiction in the design and on ground position at outlet point of treatment plant.

**Reference:** CEOWSSCA/2023/8526

Dated: 15/05/2023

I am writing in response to your letter referenced CEOWSSCA/2023/8526, in which CEO WSSCA expressed concerns and observations regarding the Tender drawing and design issued from the PMCSC office. I would like to clarify the points raised in your letter.

Firstly, you mentioned that there is a contradiction between the Tender drawing and the demarcated line. It is important to understand that if you compare the coordinates/points on the Tender drawing with those on our demarcated line, you will find that they are labeled in the same manner. This clearly indicates that both lines are identical and aligned. Therefore, there is no contradiction in the design between the drawing and the actual ground position.

Secondly, based on the demarcation carried out by the PMCSC, it is evident that the line crosses several houses in the downhill village. The undersigned conducted a field survey to propose a new alignment, which was then sent to the PMCSC design team. The design team ran the model and made adjustments to the design alignment. Please find the detailed revised design attached for your information and further necessary action.

Thank you for your attention to these matters. If you have any further questions or require additional clarification, please do not hesitate to contact me.

**Attachment:**

- Original and revised layout.
- Revised drawing of main from treatment plant to surface storage tanks.
- Completed hydraulic design.
