With reference to your letters at [1] & [2] above, I am writing to bring your attention to a crucial aspect outlined in our contract documents. As per the terms specified in the contract it is explicitly stated that the contractor bears the responsibility for the stability & adequacy of all construction operations.

It is noteworthy that The Engineer is not obligated to provide guidance to the contractor in executing the work. Instead, the contractor is expected to adhere strictly to the approved method of construction that has been submitted and approved in advance, refer letters at [2] & [3] above.

Hope the above explanation clarify the situation and now we expect that you will avoid sending unnecessary, non-productive letters which is just a waste of time & energy.

Your Sincerely

Engr. Said Afsar  
The Engineer/Resident Engineer  
Water Supply System (Abbottabad)
